Welding Safety and Health

Weld-Mask™ with *ClearLight*™

Auto-Darkening Welding Goggles

Quick Specs

Applications
Welding in tight, awkward positions
Welding with hard hats

Shades 3, 9–13

Battery Life 1.000 hours
Sensors 2
TIG Rating 20 amps

Switching Speed 1/15,000 second
Weight (not including head cover) 226 g

ClearLight™ **Lens Technology** provides advanced high-definition optics for precise arc recognition.

Compact auto-darkening lenses allow users to weld in spaces where access with traditional welding helmets is limited.

Soft close-fitting eye covering provides total darkness for precision welding.

Face shield and flame-retardant head cover provide coverage for UV/IR rays and applications with limited spatter.

Ideal for use with hard hats and industrial or construction environments. Fits under a hard hat without the need of an adapter and can be worn with a Miller® Half Mask Respirator.

Ideal for auto restoration and other DIY environments. Narrow design provides protection without getting in the way.

Shades for use with MIG, TIG, stick and grinding.

Extremely lightweight, virtually eliminates neck strain.

TRUE BLUE® 2YR. WARRANTY

Warranted for two years, parts.
